Dear Raihana Nadra Alkaff, PhD

I would like to ask you to consider our manuscript entitled “Overview of Safety Observation Tour Program Implementation with Countenance Model in PT Pelabuhan Indonesia II (Persero) Banten Branch 2019” for publication in Journal of Religion & Public Health as Original Article.

Ports play a crucial role in promoting sustainable development at regional and national levels as a major industry. Pelindo II Banten was designing safety observation tour program as unsafe acts and unsafe condition supervising at workplace as accident prevention program. This program targeted to release monthly report. But the results were not fulfill the target. This program has the benefit of identifying and addressing unsafe behaviors and conditions that are the leading causes of workplace injuries. If this program is not implemented, workplace injuries may occur in the future. We used the countenance model and hazard reporting theory as alternative to overview and evaluate the program, so that appropriate improvements can be identified.

All of the authors have read and approved the paper and it has not been published previously nor is it being considered by any other peer-reviewed journal. Your kind consideration of this paper would be greatly appreciated.

Sincerely yours,

Eka Hartomy
